Permission for Network connectivity of Secure make all APEX 100 METER(from MAIN Meter) & L&T make Meters of WBPDC for online monitoring.

**6.2. Agenda note put up by WBSEDCL**

In couple of events during real time operation it has been noticed that despite of WBSEDCL over drawl well below the stipulated limit as per prevailing DSM Regulation (generally 150MW for WBSEDCL) corresponding to WBSEDCL schedule, the State over drawl from the central sector exceeds the stipulated limit corresponding to state schedule. The reason behind the said is obviously due to over drawl of other state utilities. But as a consequence of such events ERLDC now a days allotting / withdrawing suo moto URS power/foregone share of WBSEDCL from ISGS as a corrective measure to befit the state drawl with state schedule. For such suo moto action from ERLDC, WBSEDCL immediately turns to an injecting state utility to compensate the sustained over drawl of other state utilities & hence facing commercial loss due to DSM . Though such event is very usual in intrastate ABT operation yet from rational point of view a suitable

accommodation mechanism should be explored immediately by SLDC like ERLDC, such as suo moto scheduling of over drawl quantum of over drawee state utilities from WBSEDCL with prior consent from the same, following the spirit of the WBERC order vide reference no WBERC/SM-12/15-16/0163 - 0167 dt 29.04.2016. For the above said reason , it has been observed that only WBSEDCL is incurring commercial loss through DSM for which WBSEDCL is not at all responsible in several times .
